A practical guide to ancient Mesoamerican solar and lunar rites for healing and transformation • Details shamanic rituals and practices for each period of the day, including dawn, sunrise, noon, sunset, and midnight, to best harness the energies of the sun, night sun, and moon for specific purposes, such as divination, journeying with animal spirit guides, or spiritual wisdom • Incorporates shamanic breathwork, dreamwork, mantra chanting, mudras, dancing and movement, toning, chakra work, crystals, herbs, and limpiezas (shamanic cleanses) • Explores how nighttime energies are affected by the phases of the moon, offering specific practices for each phase Ancient Mesoamerican shamans and modern practitioners of curanderismo--a Latin American shamanic healing practice--divide each day and night into distinct periods based on the sacred rhythms of the sun and moon, with each time offering opportunities to connect with specific celestial energies for healing and transformation. In this hands-on guide to working with the sacred

energies of the sun, night sun, and moon, curandera Erika Buenaflor details the rites, rituals, and deities for each part of the day and night and explores the sacred tools and techniques used by ancient Mesoamerican shamans for harnessing solar and lunar energies. She explains how the sun is the source of soul energy that heals, animates, strengthens, and revitalizes us on many levels, while night energies are transformative and conducive for connecting with nonordinary realms. She explores rituals for dawn, sunrise, and midmorning to harness the energies of creation and new beginnings; for noon and afternoon to promote peak strength and spiritual wisdom; for sunset and dusk to bring about transformation, perform divination, and journey with animal spirit guides; and for midnight and predawn to facilitate shamanic dreamwork, connect with the ancestors, make offerings, and regenerate at the deepest levels. She also explores how nighttime energies are affected by the phases of the moon and offers specific practices for each phase. By intentionally tuning our activities to the rhythms of the sun and moon, we can invite in their sacred energies of abundance and healing for more healthy, creative, mindful, and happy lives.

This is a book that relentlessly pursues defining the

goals of Christian education and then offers a plan in keeping with those goals. So many books in the field assume the goals and simply describe the methods. Not so Larry Richards. His biblical and theological analysis conveys an excitement that makes Christian education a mission, not just a responsibility. And still his approach is eminently practical, insightful, and motivational.

Including scores of maps, charts, photos, and illustrations, this is a visualguide to interpreting Scripture. Illustrations.

and Application provides a state-of-the-art summary of recent developments in the aptamer field and will be a helpful resource for scientists in the life sciences working with aptamers as tools to elucidate biological systems.

Is the universe around us a figment of our imagination? Or are our minds figments of reality? In this refreshing new look at the evolution of mind and culture, bestselling authors Ian Stewart and Jack Cohen eloquently argue that our minds necessarily evolved inextricably within the context of culture and language. They go beyond conventional reductionist ideas to look at how the mind is the response of an evolving brain trying to grapple with a complex environment. Along the way they develop new and intriguing insights into the nature of evolution, science and humanity.

Ancient Sex: New Essays presents groundbreaking work in a post-Foucauldian mode on sexuality, sexual identities, and gender identities in ancient Greece and Rome. Since the production of Foucault's History of Sexuality, the field of classics has been caught in a recursive loop of argument regarding the existence--or lack thereof--of "sexuality" (particularly "homosexuality") as a meaningful cultural concept for ancient Greece and Rome. Much of the argument concerning these issues, however, has failed to engage with the central argument of Foucault's work, namely, the assertion that sexuality as we understand it is the correlative of a historically specific form of medical and legal discourse that emerged only in the late nineteenth century. Rather than reopening old debates, Ancient Sex takes up Foucault's call for discursive analysis and elucidates some of the ways that ancient Greek and Roman texts and visual arts

articulate a culturally specific discourse about sexual matters. Each contributor presupposes that sexual and gendered identities are discursively produced, and teases out some of the ways that the Greeks and Romans spoke and thought about these issues. Comprising essays by emerging and established scholars, this volume emphasizes in particular: sexual discourses about women; the interaction between sexual identities and class status; gender as an unstable discursive category (even in antiquity); and the relationships between ancient and modern sexual categories.

On the Trail of Robert Pirsig's Zen and the Art of Motorcycle Maintenance, Zen and Now is the story of a story that will appeal to the 5 million readers of the original and serve as an initiation to a whole new

generation. Since its original publication in 1968, *Zen and the Art of Motorcycle Maintenance: An Inquiry into Values* has touched whole generations of readers with its serious attempt to define “quality” in a world that seems indifferent to the responsibilities that quality brings. Mark Richardson expands that journey with an investigation of his own – to find the enigmatic author of *Zen and the Art*, ask him a few questions, and place his classic book in context. The result manages to be a biography of Pirsig himself – in the discovery of an unknown life of madness, murder and eventual resolution – and a splendid meditation on creativity and problem-solving, sanity and insanity.

Although Hannah Arendt is not primarily known as a Jewish thinker, she probably wrote more about Jewish issues than any other topic. When she was in her mid-twenties and still living in Germany, Arendt wrote about the history of German Jews as a people living in a land that was not their own. In 1933, at the age of twenty-six, she fled to France, where she helped to arrange for German and eastern European Jewish youth to quit Europe and become pioneers in Palestine. During her years in Paris, Arendt’s principal concern was with the transformation of antisemitism from a social prejudice to a political policy, which would culminate in the Nazi “final solution” to the Jewish question—the physical destruction of European Jewry. After France fell at the beginning of World War II, Arendt escaped from an internment camp in Gurs and made her way to the United States. Almost immediately upon her arrival in New York she wrote one article after another calling for a Jewish army to fight the

Nazis, and for a new approach to Jewish political thinking. After the war, her attention was focused on the creation of a Jewish homeland in a binational (Arab-Jewish) state of Israel. Although Arendt's thoughts eventually turned more to the meaning of human freedom and its inseparability from political life, her original conception of political freedom cannot be fully grasped apart from her experience as a Jew. In 1961 she attended Adolf Eichmann's trial in Jerusalem. Her report on that trial, *Eichmann in Jerusalem*, provoked an immense controversy, which culminated in her virtual excommunication from the worldwide Jewish community. Today that controversy is the subject of serious re-evaluation, especially among younger people in America, Europe, and Israel. The publication of *The Jewish Writings*—much of which has never appeared before—traces Arendt's life and thought as a Jew. It will put an end to any doubts about the centrality, from beginning to end, of Arendt's Jewish experience.

This book clearly spells out the scriptural implications of the present rule of Christ in the church and the calling of church leaders to be, first of all, servants. Diagrams, probe sections and indexes.

*Bring the Bible to Your Students like Never Before* Communicating the Scriptures is much like building a bridge. However, instead of ravines or rivers, the teacher must span both cultural boundaries and great gulfs of time between the present and the pasts of Moses, David, Jesus, and Paul. Though God's Word is always relevant, the teacher must help students see Scripture's vast treasures. The effective, engaging Bible teacher

must, therefore, become creative. Together, Lawrence Richards and Gary Bredfeldt have created the ultimate guide to building bridges for those seeking to learn about God's Word. Creative Bible Teaching offers a five-step process by which Christian educators can construct a bridge across time, geography, and culture to help students of all ages connect with God's Word. This newly revised edition makes learning about God's Word more accessible for both teachers and students today. Simple, clear, and memorable, the method laid out in Creative Bible Teaching provides a sure-fire way of communicating God's Word in a way that sticks.

Much research has focused on the basic cellular and molecular biological aspects of stem cells. Much of this research has been fueled by their potential for use in regenerative medicine applications, which has in turn spurred growing numbers of translational and clinical studies. However, more work is needed if the potential is to be realized for improvement of the lives and well-being of patients with numerous diseases and conditions. With a goal to accelerate advances by timely information exchange, this new book series 'Cell Biology and Translational Medicine (CBTMED)' as part of SpringerNature's longstanding and very successful Advances in Experimental Medicine and Biology book series is launched. Emerging areas of regenerative medicine and translational aspects of stem cells will be covered in each volume. Outstanding researchers are recruited to highlight developments and remaining challenges in both the basic research and clinical arenas. This current book is the first volume of a

continuing series.

Ecopolitics is a study of environmental awareness - or non-awareness - in contemporary French theory. Arguing that it is now impossible not to think in an ecological way, Verena Andermatt Conley traces the roots of today's concern for the environment back to the intellectual climate of the late 50s and 60s. The author considers key texts by influential figures such as Michael Serres, Paul Virilio, Gilles Deleuze and Felix Guattari, Michel de Certeau, Hélène Cixous and Luce Irigaray. Ecopolitics rehabilitates some ecological components of French intellectual thought of the past thirty years, and reassesses French poststructural thinkers who explicitly deal with ecology in their work.

The second edition of The Teaching Ministry of the Church makes a major overhaul of its predecessor,

increasing the content from eighteen to twentythree chapters and contributors from six to thirteen. These writers assert the need for such an expanded update is due to our everchanging world. For example, the rise of Islamic fundamentalism, proliferation of religious sects, and secularization of our culture greatly increase the importance of ensuring the church produces fully developed, biblically informed followers of Jesus. To that end, The Teaching Ministry of the Church presents a full overview of Christian education in four major sections: Theological Foundations, Biblical Foundations, Preparation for Teaching, and Structuring the Teaching Ministry of the Church. Within this framework, a step-by-step plan for establishing and maintaining an effective teaching ministry among preschoolers, children, youth, and adults takes shape. Key chapters: "The Bible as Curriculum," "The Church's Role in Teaching," "Creating an Unforgettable Learning Experience," and "Equipping Teachers."

"fMRI researchers do not sit passively staring at computer screens but actively involve their bodies in laboratory practice. Discussing fMRI visuals with colleagues, scientists animate the scans with gestures and talk as they work with computers. Ala' argues that to understand how digital scientific visuals take on meaning, we must consider their dynamic coordination with gestures, speech, and working hands. These multimodal interactions, she suggests, are an essential component of digital scientific works...Scientific practices in the fMRI lab demonstrate thinking that engages the whole lived body and the world in which the body is situated. The turn toward the digital does not bring with it abstraction but a manual and embodied

engagement. The practical and multimodal engagement with digital brains in the laboratory challenges certain assumptions behind fMRI technology; it suggests our hands are essential to learning and the making of meaning." --From jacket description.
