This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

One of the great aircraft of the Cold War era, the McDonnell Douglas F-4 Phantom II was the most heavily produced supersonic, all-weather fighter bomber. Capable of a top speed of Mach 2.23, it set sixteen world records including an absolute speed record of 1,606 mph and an altitude record of 98,557 feet. The F-4 flew Vietnam, in the Arab-Israeli conflict, and the Gulf War and amassed a record of 393 aerial victories. F-4s also flew as part of the USAF Thunderbirds and the U.S. Navy Blue Angels flight demonstration teams. Originally printed by McDonnell and the U.S. Navy in the 1960s, this flight operating handbook taught pilots everything they needed to know before entering the cockpit. Classified "restricted", the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been reformatted. Care has been taken however to preserve the integrity of the text.

The job interview is probably the most important step you will take in your job search journey. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

Asperger Syndrome: An Owner's Manual Volume 2 for Older Adolescents and Adults is the eagerly anticipated sequel to Asperger Syndrome--An Owner's Manual, which was primarily designed for middle school-age children. The second volume is modeled after its predecessor insofar as it offers information about Asperger Syndrome and other autism spectrum disorders in a respectful and positive manner. This interactive workbook deals with issues that young adults and adults face such as relationships, marriage, independent living skills, employment, self-care and executive functioning. This much-needed resource is designed to inform and support the individual with AS as he or she comes to grips with her strengths and challenges and plans for a successful adulthood within the neurotypical world. Asperger Syndrome: An Owner's Manual Volume 2 for Older Adolescents and Adults presents AS as a "way of being" rather than solely as a "deficit" or "deficiency." This approach itself is encouraging and empowering. This practical workbook guides users through a process of self-discovery that allows them to understand how AS affects their daily lives. This information is then utilized to create plans and strategies customized to meet the unique needs of the user in an effort to reach self-set goals.

Alpha Architecture Reference Manual, Third Edition is the authoritative reference on the definition of Alpha architecture. Revised by the Alpha Architecture Committee, this book contains a complete description of the common architecture required of all implementations and describes the interfaces to support the Windows NT, Digital UNIX, and OpenVMS operating systems. The third edition reflects the latest implementations of the architecture, including the 21164A, 21164PC, and 21264. Some of the extensions to the architecture and the enhancement to the technical content include: new byte and word load, store and sign-extend operations; new multimedia instructions; new population enumeration and floating-point square root instructions; new instructions to improve data cache efficiency and updated Windows NT section. The Alpha chip is the fastest chip on the marketplace today. It runs Windows NT, UNIX and OpenVMS operating systems. New base-level server configurations provide four times the memory of current systems. Contains updated Windows NT section to reflect current technical port to Alpha Includes new insights into the software aspects of the implementation Covers new multimedia instructions for increased performance with high-end graphics applications Petrogav International provides courses for participants that intend to work on onshore oil and gas fields. Training courses are taught by professionals from the oil and gas industry with current knowledge and more than 25 years of field experience. The participants will get all the necessary competencies to work on the onshore oil and gas fields. It is intended also for non-drilling and non-production personnel who work in drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. This course provides a non-technical overview of the phases, operations and terminology used on onshore oil and gas fields. It is intended also for non-production personnel who work in the onshore drilling, exploration and production industry. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

The fascinating inside story behind the cult French fashion label A.P.C. A.P.C. (Atelier de Production et de Création) was created as a reaction to the excesses of the 1980s, and the minimalist designs of founder Jean Touitou now have a cult following. This compelling book, published on the occasion of A.P.C.'s 30th anniversary, carries the same minimal aesthetic - yet it's packed with never-before-seen illustrations and ephemera. Part retrospective of the brand and part personal scrapbook and visual diary, the book includes invitations, postcards, ad campaigns, images of their stores, and collaborations with other designers.

The A-7 Corsair II served the U.S. Navy for over over two decades, and flew with distinction during the Vietnam conflict. The subsonic A-7 was based on Chance Vought's supersonic F-8 Crusader. It boasted a heads-up display, an inertial navigation system, and other innovations. The plane entered service in 1966, and served in Vietnam in late 1967. Its performance was impressive. The USS Ranger's VA-147 flew over 1,400 sorties with the loss of only one aircraft. The Air Force purchased an advanced version, the A-7D, equipped with a more powerful engine. The plane later flew missions over Lebanon, Libya, Grenada, Panama, and Iraq. The last planes in U.S inventory were retired in 1991. Originally printed by the U.S. Navy and Vought, this handbook for the A-7 provides a fascinating glimpse inside the cockpit of this famous aircraft. Originally classified as restricted, the manual was recently declassified and is here reprinted in book form.
