Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

The demand for broadband connectivity is growing rapidly, but cannot be met effectively by existing wireline technology. WiMAX has the potential to provide widespread Internet access that can usher in economic growth, better education and healthcare, and improved entertainment services. Examining the technology's global development and deployment a

The main intent of this book is to prepare the North American sailor for his first crossing of the Atlantic to Europe. It is actually so exhaustive in its coverage that it will indeed help the bluewater sailor to learn how to cross any ocean in the world.

This book presents the combined proceedings of the 10th International Conference on Computer Science and its Applications (CSA 2018) and the 13th KIPS International Conference on Ubiquitous Information Technologies and Applications (CUTE 2018), both held in Kuala Lumpur, Malaysia, Dec 17 - 19, 2018. The aim of these two meetings was to promote discussion and interaction among academics, researchers and professionals in the field of ubiquitous computing technologies. These proceedings reflect the state of the art in the development of computational methods, involving theory, algorithms, numerical simulation, error and uncertainty analysis and novel applications of new processing techniques in engineering, science, and other disciplines related to ubiquitous computing.

What is it like to be suddenly rich beyond your wildest dreams? What is it like to discover how deeply your hatred of rapist is?

What is it like to become a government assassin to fill that hatred? Discover the dangers of being rich as you follow birth and growth of Mamba through these discoveries. An advanced look at smart technology to promote the independence of the elderly and disabled Ongoing research and advancements in technology are essential for the continuing independence of elderly and disabled persons. The Engineering Handbook of Smart Technology for Aging, Disability, and Independence provides a thorough analysis of these technologies and the needs of the elderly and disabled, including a breakdown of demographics, government spending, growth rate, and much more. Each chapter is written by an expert in his or her respective field, and gives readers unparalleled insight into the research and developments in a multitude of important areas, including: User-need analyses, classifications, and policies Assistive devices and systems for people with motor disabilities Assistive devices and systems for people with visual and hearing impairments Human-machine interaction and virtual reality Assistive robotics Technology for user mobility and object manipulation Smart homes as assistant environments A discussion of emerging standards and guidelines to build accessible devices, tools, and environments This book is an indispensable resource for researchers and professionals in computer science, rehabilitation

science, and clinical engineering. It also serves as a valuable textbook for graduate students in the aforementioned fields. More than 100,000 entrepreneurs rely on this book for detailed, step-by-step instructions on building successful, scalable, profitable startups. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, co-creator with Eric Ries of the "Lean Startup" movement and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams, plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you:

- Avoid the 9 deadly sins that destroy startups' chances for success
- Use the Customer Development method to bring your business idea to life
- Incorporate the Business Model Canvas as the organizing principle for startup hypotheses
- Identify your customers and determine how to "get, keep and grow" customers profitably
- Compute how you'll drive your startup to repeatable, scalable profits.

The Startup Owner's Manual was originally published by K&S Ranch Publishing Inc. and is now available from Wiley. The cover, design, and content are the same as the prior release and should not be considered a new or updated product. This single, highly illustrated volume contains everything that the owner of a new or traditional boat will need to maintain her in a safe and seaworthy condition at minimum cost. Its detailed tables provide a unique survey of the real cost of every aspect of yacht upkeep.

Life was good for former Marine Lieutenant David LaSalle and his wife Stacy as they brought to reality their dream of living on a yacht in Ft. Lauderdale. But a downturn in the economy and the loss of a major contract for David's network engineering business threatened to tear apart the world they created for themselves. A chance encounter with a DEA investigation gives LaSalle access to sensitive information about drug deals in Miami's high intensity drug trafficking area, and he hatches a plan along with four of his friends to embark on a lucrative venture of privately interdicting a major drug transaction out on the open waters of the Gulf of Mexico. The plan is a success, but it all comes unraveled when the DEA discovers their activities. Instead of arresting the group, the government recruits them to do jobs that regular law enforcement cannot do. They go from being modern day pirates to modern day privateers, but unknown to LaSalle or any of the others, the government has an ulterior motive. *Black Bart One* is a thrilling ride through the seedy underbelly of the drug trade and the intricacies of government politics.

Since writing the previous edition of *Storm Tactics Handbook*, Lin and Larry have voyaged an additional 55,000 miles. This has taken them as far north as Norway, twice across the Atlantic, south to Argentina and into the Pacific, around Cape Horn contrary to the prevailing winds then on a North Pacific circuit. With insights gained from these recent voyages, they have fully revised and expanded this text by more than 40% including seven completely new chapters – among them;

Lessons from Cape Horn,

An interview on storm survival and heaving to with the late Sir Peter Blake,

Heaving-to using a Gale Rider on 55 foot Morgan's Cloud,

Adding Rudder Protection Stops.

Discussions on avoiding chafe, building and using storm staysails, choosing storm gear, when to deploy para-anchors, tactics for avoiding the worst areas of cyclonic storms and many more have been expanded to answer questions posed by readers and seminar attendees.
