The Ethiopia Africa Research in Sustainable Intensification for the Next Generation (Africa RISING) Baseline Evaluation Survey (EARBES) survey was implemented during June–July 2014 as part of the International Food Policy Research Institute's Monitoring and Evaluation (M&E) of Africa RISING.¹ The Africa RISING program aims to create—through action research and development partnerships—opportunities for smallholder farmers in Africa south of the Sahara to sustainably intensify their farming systems and to improve their food, nutrition, and income security. Initiated in 2012, the program is supported by the United States Agency for International Development (USAID) as part of the U.S. government's Feed the Future (FTF) initiative. As part of the program, the International Institute of Tropical Agriculture (IITA) leads a sustainable intensification effort focusing on the cereal-based farming systems in the Guinea Savannah Zone of West Africa (Ghana and Mali) and East and Southern Africa (Malawi, Tanzania, and Zambia) while the International Livestock Research Institute (ILRI) leads the research activities focusing on the crop-livestock systems of the Ethiopian highlands. The International Food Policy Research Institute (IFPRI) has been tasked with M&E of the three projects. Ethiopia Africa RISING is being

implemented in Goshe Bado, Gudo Beret, Salka, Ilu-Sanbitu, Jawe, Upper Gana, Emba Hasti, and Tsibet kebeles in Amhara, Oromia, Southern Nationalities and People's (SNNP), and Tigray regions of Ethiopia, within the FTF Zones of Influence. The research activities are led by ILRI. EARBES collected detailed household- and plot-crop level data addressing various topics: employment (agricultural and non-agricultural); health; agricultural land; crop inputs, harvest, storage, and sale; livestock ownership, feed, and water; agriculture-related challenges and coping strategies; credit and off-farm income sources; housing conditions and ownership of various durable assets; subjective welfare and food security; household-level food consumption; non-food expenditure; agricultural shocks; and child and women anthropometry. The community survey collected data on access to basic services; access to extension services; social organizations, mobility, and village-level shocks; access to natural resources; metric conversion units; and prices of crops and food items.

Vibe is the lifestyle guide to urban music and culture including celebrities, fashion, beauty, consumer electronics, automotive, personal care/grooming, and, always, music. Edited for a multicultural audience Vibe creates trends as much as records them.

image analysis, robotic sensory systems, software/hardware and system simulation, robot control, applications, and reports of group meetings. A beautifully illustrated book from Cleo Wade—the artist, poet, and speaker who has been called “the Millennial Oprah” by New York Magazine—that offers creative inspiration and life lessons through poetry, mantras, and affirmations, perfect for fans of the bestseller *Milk & Honey*. True to her hugely popular Instagram account, Cleo Wade brings her moving life lessons to *Heart Talk*, an inspiring, accessible, and spiritual book of wisdom for the new generation. Featuring over one hundred and twenty of Cleo’s original poems, mantras, and affirmations, including fan favorites and never before seen ones, this book is a daily pep talk to keep you feeling empowered and motivated. With relatable, practical, and digestible advice, including “Hearts break. That’s how the magic gets in,” and “Baby, you are the strongest flower that ever grew, remember that when the weather changes,” this is a portable, replenishing pause for your daily life. Keep *Heart Talk* by your bedside table or in your bag for an empowering boost of spiritual adrenaline that can help you discover and unlock what is blocking you from thriving emotionally and spiritually.

Guide to Evidence-Based Physical Therapist Practice,
Third Edition provides readers with the information and

tools needed to appreciate the philosophy, history, and value of evidence-based practice, understand what constitutes evidence, search efficiently for applicable evidence in the literature, evaluate the findings in the literature, and integrate the evidence with clinical judgment and individual patient preferences and values. This unique handbook marries the best elements of multiple texts into a single accessible guide. *Guide to Evidence-Based Physical Therapist Practice, Third Edition* is updated and revised, including a vibrant 2-color engaging layout, improved organization, additional statistics coverage, and expanded resources for instructors and students. Its reader-friendly style facilitates learning and presents the knowledge and skills essential for physical therapist students to develop a foundation in research methods and methodologies related to evidence-based medicine. Students will learn how evaluate research designs, appraise evidence, and apply research in clinical practice. This is a comprehensive resource no physical therapist or student should be without. **NEW TO THE THIRD EDITION** • Features a new two-color design • Includes updated research examples • Presents statistics coverage in two chapters with more manageable content to review **Description and Inference** • Contains expanded content related to qualitative research designs • Provides qualitative research examples to illustrate the contribution of these designs to a physical therapist's ability to discern and understand individual patient/client applications • Explores examples of circumstances where biases and limitations have resulted in errors •

Offers new instructor and student resources

INSTRUCTOR RESOURCES • Sample Syllabus (corresponding with APTA's Guide to Physical Therapist Practice 3.0 and the 2016 CAPTE Evaluative Criteria) • PowerPoint Presentations for each chapter • New Test Bank with 150 questions • Revised Sample Evidence Appraisal Worksheets • Helpful Resource List with additional references • Answer Key - Sample Answers for End of Chapter Questions **STUDENT RESOURCES:** Navigate Companion Website, including: Crossword Puzzles, Flashcards, Interactive Glossary, Practice Quizzes, Web Links, Screenshots of electronic databases

The Tanzania Africa Research in Sustainable Intensification for the Next Generation (Africa RISING) Baseline Evaluation Survey (TARBES) was implemented during February-April 2014 as part of the International Food Policy Research Institute's Monitoring and Evaluation (M&E) of Africa RISING. The Africa RISING program aims to create—through action research and development partnerships—opportunities for smallholder farmers in Africa south of the Sahara to sustainably intensify their farming systems and to improve their food, nutrition, and income security. Initiated in 2012, the program is supported by the United States Agency for International Development (USAID) as part of the U.S. government's Feed the Future (FTF) initiative. As part of the program, the International Institute of Tropical Agriculture (IITA) leads a sustainable intensification effort focusing on the cereal-based farming systems in the Guinea Savannah Zone of West Africa (Ghana and Mali)

and East and Southern Africa (Malawi, Tanzania, and Zambia) while the International Livestock Research Institute (ILRI) leads the research activities focusing on the crop-livestock systems of the Ethiopian highlands. The International Food Policy Research Institute (IFPRI) has been tasked with M&E of the three projects. Tanzania Africa RISING is being implemented in Babati, Kongwa, and Kiteto districts in Tanzania. The research activities are led by IITA. TARBES collected detailed household- and plot-crop level data addressing various topics: employment (agricultural and non-agricultural); health; agricultural land; crop inputs, harvest, storage, and sale; livestock ownership, feed, and water; agriculture-related challenges and coping strategies; credit and off-farm income sources; housing conditions and ownership of various durable assets; subjective welfare and food security; household-level food consumption; non-food expenditure; agricultural shocks; and child and women anthropometry. The community survey collected data on access to basic services; access to extension services; social organizations, mobility, and village-level shocks; access to natural resources; metric conversion units; and prices of crops and food items. TARBES covered 810 households and 25 communities drawn from the three project districts. Data was collected using structured questionnaires in multiple local languages through Computer Assisted Personal Interviewing (using Surveybe).

Recognizing Celiac Disease is the complete guide to recognizing, diagnosing and managing celiac disease. It is a reader-friendly, reference manual written for both

medical professionals and the general public. The NIH now estimates celiac disease affects up to 1 in 100 people, making Recognizing Celiac Disease both timely and urgently needed. The book provides: Up-to-date scientific information obtained from hundreds of research studies and case reports from around the world.

Explanations of gluten (the cause of celiac disease), sources of gluten in food and how gluten triggers a harmful reaction in the body. An overview of celiac disease, including background, prevalence, description, pathophysiology, manifestations, diagnosis, management and prognosis. A complete description of the digestive process and how gluten disrupts both organ structure and function. The 3-Step Process for gluten-free diet self-management. This book will act as a guide and resource for successful dietary management by clinicians and individuals. Helpful lists of foods and ingredients commonly allowed and not allowed on a gluten-free diet. Nutritional charts detailing how deficiencies show, research study findings, case reports, response to gluten-free diet, and lists of foods with the highest sources of each nutrient to enable any person to assess his own, or a patients, state of health regarding nutritional deficiencies related to celiac disease and then manage those deficiencies. Concise charts of over 300 health manifestations detailing prevalence, description, relationship to celiac disease, symptoms, causes and response to the gluten-free diet aid clinicians and patients in identifying and treating disorders caused by, or related to, celiac disease. 2 indexes, a comprehensive glossary, charts, figures and numbered citations from

hundreds of medical journals, periodicals and texts for further study. The main index, listing over 1,000 entries, enables readers to quickly find what they are looking for and learn whether any worldwide medical studies have associated a medical condition or symptom with celiac disease. *Recognizing Celiac Disease* is the first compendium on celiac disease. It has received endorsements from faculty at Columbia, Harvard, Jefferson and Temple University medical schools. *Recognizing Celiac Disease* is also endorsed by the National Foundation for Celiac Awareness and the Celiac Sprue Association USA. Whether you work in a medical field or are just interested in celiac disease, *Recognizing Celiac Disease* is a valuable reference tool you will use again and

again. www.recognizingceliacdisease.com

From the bestselling author of *Team of Teams* and *My Share of the Task*, an entirely new way to understand risk and master the unknown. Retired four-star general Stan McChrystal has lived a life associated with the deadly risks of combat. From his first day at West Point, to his years in Afghanistan, to his efforts helping business leaders navigate a global pandemic, McChrystal has seen how individuals and organizations fail to mitigate risk. Why? Because they focus on the probability of something happening instead of the interface by which it can be managed. In this new book, General McChrystal offers a battle-tested system for detecting and responding to risk. Instead of defining risk as a force to predict, McChrystal and coauthor Anna Butrico show that there are in fact ten dimensions of

control we can adjust at any given time. By closely monitoring these controls, we can maintain a healthy Risk Immune System that allows us to effectively anticipate, identify, analyze, and act upon the ever-present possibility that things will not go as planned. Drawing on examples ranging from military history to the business world, and offering practical exercises to improve preparedness, McChrystal illustrates how these ten factors are always in effect, and how by considering them, individuals and organizations can exert mastery over every conceivable sort of risk that they might face. We may not be able to see the future, but with McChrystal's hard-won guidance, we can improve our resistance and build a strong defense against what we know—and what we don't.

The Mali Africa Research in Sustainable Intensification for the Next Generation (Africa RISING) Baseline Evaluation Survey (MARBES) survey was implemented during May-July 2014 as part of IFPRI's Monitoring and Evaluation (M&E) of Africa RISING. The Africa RISING program aims to create-through action research and development partnerships-opportunities for smallholder farmers in Africa south of the Sahara to sustainably intensify their farming systems and to improve their food, nutrition, and income security. Initiated in 2012, the program is supported by the United States Agency for International Development (USAID) as part of the U.S. government's Feed the Future (FTF) initiative. As part of the program, the International Institute of Tropical Agriculture (IITA) leads a sustainable intensification effort focusing on the cereal-based farming systems in the

Guinea Savannah Zone of West Africa (Ghana and Mali) and East and Southern Africa (Malawi, Tanzania, and Zambia) while the International Livestock Research Institute (ILRI) leads the research activities focusing on the crop-livestock systems of the Ethiopian highlands. The International Food Policy Research Institute (IFPRI) has been tasked with M&E of the three projects. Mali Africa RISING is being implemented in Bougouni, Yanfolila and Koutiala cercles (the cercle is a type of administrative region), in the Sikasso region of Mali, within the FTF Zones of Influence. The research activities are led by IITA, the International Crops Research Institute for the Semi-Arid Tropics (ICRISAT), ILRI, the Asian Vegetable Research and Development Center (AVRDC), and the International Center for Research in Agroforestry or World Agroforestry Center (ICRAF), as well as local partners: L'Association Malienne d'Eveil et de Développement Durable (AMEDD), l'Association Malienne pour la Sécurité et la Souveraineté Alimentaires (AMASSA), and Mouvement Biologique du Mali (MOBIOM). MARBES collected detailed household- and plot-crop level data addressing various topics: employment (agricultural and non-agricultural); health; agricultural land; crop inputs, harvest, storage, and sale; livestock ownership, feed, and water; agriculture-related challenges and coping strategies; credit and off-farm income sources; housing conditions and ownership of various durable assets; subjective welfare and food security; household-level food consumption; non-food expenditure; agricultural shocks; and child and women anthropometry. The

community survey collected data on access to basic services; access to extension services; social organizations, mobility, and village-level shocks; access to natural resources; metric conversion units; and prices of crops and food items. MARBES covered 705 households and 20 communities drawn from the three project cercles. Data was collected using structured questionnaires in multiple local languages through Computer Assisted Personal Interviewing, using the Census and Survey Processing System (CSPro). The Ghana Africa Research in Sustainable Intensification for the Next Generation (Africa RISING) Baseline Evaluation Survey (GAR BES) survey was implemented from May to July 2014 as part of IFPRI's Monitoring and Evaluation (M&E) of Africa RISING. Africa RISING aims to create opportunities for smallholder farmers in Africa south of the Sahara (through action research and development partnerships) by sustainably intensifying their farming systems and improving food, nutrition, and income security. Initiated in 2012, the program is supported by the United States Agency for International Development (USAID) as part of the U.S. government's Feed the Future (FTF) initiative. The International Institute of Tropical Agriculture (IITA) leads a sustainable intensification effort focusing on the cereal-based farming systems in the Guinea Savannah Zone of West Africa (Ghana and Mali) and East and Southern Africa (Malawi, Tanzania, and Zambia) while the International Livestock Research Institute (ILRI) leads the research activities focusing on the crop-livestock systems of the Ethiopian highlands. The

International Food Policy Research Institute (IFPRI) has been tasked with M&E of the three projects. Ghana Africa RISING is being implemented in Northern, Upper East, and Upper West regions of Ghana, within the FTF Zones of Influence. The research activities are led by IITA and Wageningen University (WUR). GARBES collected detailed household- and plot-crop level data addressing various topics: employment (agricultural and non-agricultural); health; agricultural land; crop inputs, harvest, storage, and sale; livestock ownership, feed, and water; agriculture-related challenges and coping strategies; credit and off-farm income sources; housing condition and ownership of various durable assets; subjective welfare and food security; household-level food consumption; non-food expenditure; agricultural shocks; and child and women anthropometry. The community survey collected data on access to basic services; extension services; social organizations, mobility, and village-level shocks; access to natural resources; metric conversion units; and prices of crops and food items. GARBES covered 1,284 households and 50 communities drawn from the three project regions. Data were collected using structured questionnaires in multiple local languages through Computer Assisted Personal Interviewing (using SurveyCTO).

It may be true that MS-DOS is dead as a stand-alone operating system. However, command syntax, parameters, parsing commands, and troubleshooting are all handled better from the command line interface than in Windows. This textbook explores these concepts using the MS-DOS window in Windows 95 or Windows

98. A careful step-by- step approach

Surveys the computer equipment and software for telecommunications and provides step-by-step instructions on how to use a personal computer to communicate with other computers

Our civilisation stands on the brink of catastrophe. Our thirst for energy has led to threats from global warming, nuclear disaster and conflict in oil-rich countries. We are running out of options. Solar power, Keith Barnham argues, is the answer. In this eye-opening book, he shows how a solar revolution is developing based on one of Einstein's lesser known discoveries, one that gave us laptop computers and mobile phones. An accessible guide to renewable technology and a hard-hitting critique of the arguments of solar sceptics, *The Burning Answer* outlines a future in which the fuel for electric cars will be generated on our rooftops. It is, above all, an impassioned call to arms to join the solar revolution before it's too late.

-- Not only explains the new features of Windows .NET Server 2003, but also provides continued support for Windows 2000 administration.-- Covers changes in security, Active Directory, Microsoft Management Console, and integration with the .NET Framework, among many others changes.Windows .NET Server 2003 is the first Microsoft product that is innately affected by the company's recent Trustworthy Computing initiative. If this is successful, this will be the most stable, reliable, and dependable server OS that Microsoft has ever released. It will also feature an integrated environment with the .NET Framework and the Common

Language Runtime. The Ultimate Windows .NET Server 2003 System Administrator's Guide is an essential resource for planning, deploying, and administering a Windows .NET enterprise system. The authors draw on years of experience designing and administering Windows NT and UNIX systems in order to guide you through the varied tasks involved in real-world system administration. There are detailed discussions of key Windows .NET Server administrative functions, and descriptions of many advanced tools and optional components. In addition the authors have included a comprehensive and convenient command reference. This volume contains the proceedings of a workshop held in Grenoble in June 1989. This was the first workshop entirely devoted to the verification of finite state systems. The workshop brought together researchers and practitioners interested in the development and use of methods, tools and theories for automatic verification of finite state systems. The goal at the workshop was to compare verification methods and tools to assist the applications designer. The papers in this volume review verification techniques for finite state systems and evaluate their relative advantages. The techniques considered cover various specification formalisms such as process algebras, automata and logics. Most of the papers focus on exploitation of existing results in three application areas: hardware design, communication protocols and real-time systems. Cleo the cat encourages readers to play a guessing game as children reinforce their letter skills. On board pages.

Tackle breastfeeding challenges with clear info and confidence Breastfeeding moms will tell you milk makin' comes with health and convenience benefits--and a million questions. Lactivate! is a judgment-free advice book with the latest knowledge of breastfeeding, supporting you to make the best decisions for yourself and your family. From solving everyday breastfeeding problems to clearing a plugged milk duct, this guide will help you create the ultimate biological synchronization between you and your child. This great breastfeeding book includes: First 90 days--Learn helpful information, like how to optimize your breast pump and how to monitor your milk supply. FAQ--When will your milk come in? Are there foods you can't eat? All your questions are answered. Helpful illustrations--Images show you how your baby should latch and how to identify the fungal infection thrush. The breastfeeding strategies and principles in Lactivate! will allow you to raise your child with confidence.
