Young people's natural questions, behaviors and curiosities around sexuality create some of life's awkward and challenging moments for parents. Yet these opportunities invite parents to have important conversations - to share personal values, beliefs, and age-appropriate information with their children. There's No Place Like Home... for Sex Education offers a friendly and practical guide for having these conversations with confidence, comfort, and humor, from the experts at Planned Parenthood of Southwestern Oregon. Mary Gossart has worked in the field of health and sexuality education since 1975. As the Vice President of Education and Training at Planned Parenthood of Southwestern Oregon, and more importantly as a mom and "Grammy," she supports families in having honest, intentional communication about sexuality.

"Searing. Powerful. Needed." —Oprah "Sometimes a single story can change the world. Unbound is one of those stories. Tarana's words are a testimony to liberation and love." —Brené Brown From the founder and activist behind one of the largest movements of the twentieth and twenty-first centuries, the "me too" movement, Tarana Burke debuts a powerful memoir about her own journey to saying those two simple yet infinitely powerful words—me too—and how she brought empathy back to an entire generation in one of the largest cultural events in American history. Tarana didn't always have the courage to say "me too." As a child, she reeled from her sexual assault, believing she was responsible. Unable to confess what she thought of as her own sins for fear of shattering her family, her soul split in two. One side was the bright, intellectually curious third generation Bronxite steeped in Black literature and power, and the other was the bad, shame ridden girl who thought of herself as a vile rule breaker, not of a victim. She tucked one away, hidden behind a wall of pain and anger, which seemed to work...until it didn't. Tarana fought to reunite her fractured soul, through organizing, pursuing justice, and finding community. In her debut memoir she shares her extensive work supporting and empowering Black and brown girls, and the devastating realization that to truly help these girls she needed to

help that scared, ashamed child still in her soul. She needed to stop running and confront what had happened to her, for Heaven and Diamond and the countless other young Black women for whom she cared. They gave her the courage to embrace her power. A power which in turn she shared with the entire world. Through these young Black and brown women, Tarana found that we can only offer empathy to others if we first offer it to ourselves. Unbound is the story of an inimitable woman's inner strength and perseverance, all in pursuit of bringing healing to her community and the world around her, but it is also a story of possibility, of empathy, of power, and of the leader we all have inside ourselves. In sharing her path toward healing and saying "me too," Tarana reaches out a hand to help us all on our own journeys.

On its own, C# simplifies network programming. Combine it with the precise instruction found in C# Network Programming, and you'll find that building network applications is easier and quicker than ever. This book helps newcomers get started with a look at the basics of network programming as they relate to C#, including the language's network classes, the Winsock interface, and DNS resolution. Spend as much time here as you need, then dig into the core topics of the network layer. You'll learn to make socket connections via TCP and "connectionless" connections via UDP. You'll also discover just how much help

C# gives you with some of your toughest chores, such as asynchronous socket programming, multithreading, and multicasting. Network-layer techniques are just a means to an end, of course, and so this book keeps going, providing a series of detailed application-layer programming examples that show you how to work with real protocols and real network environments to build and implement a variety of applications. Use SNMP to manage network devices, SMTP to communicate with remote mail servers, and HTTP to Web-enable your applications. And use classes native to C# to query and modify Active Directory entries. Rounding it all out is plenty of advanced coverage to push your C# network programming skills to the limit. For example, you'll learn two ways to share application methods across the network: using Web services and remoting. You'll also master the security features intrinsic to C# and .NET--features that stand to benefit all of your programming projects.

Almost all organisations today face unprecedented levels of change, complexity and volatility. Navigating the resultant disruption dynamics is one of the most important stewardship challenges facing strategic leaders. Getting it right can pay enormous dividends, but getting it wrong can lead to spectacular failure and the ultimate demise of once admired organisations. To address this threat, strategic leaders need to better understand how to navigate complexity and volatility and

how to execute strategy in this rapidly changing environment. This book identifies 12 different strategy execution processes used to realise deliberate and emergent strategies – each illustrated with case studies and essential lessons for strategic leaders. The authors then discuss the effectiveness of these processes in different types of complex environments, showing how, used in isolation, each process can, at times, impede performance, sometimes creating survival risks that materialise today or in the future. The authors show the importance of "ambidexterity" and the need for organisations to balance the pursuit of internal efficiency and external market flexibility, both of which are essential to thriving in complex environments. This book provides essential tools for leaders to rethink and reconfigure their strategy execution practices in light of the significant change surrounding their organisations. The book is based on a 5-year, multistage study comprehensively reviewing cutting-edge research on strategy execution, reviewing seminal texts on strategy execution and, through in-depth case study interviews and cross-sectional surveys, identifying contemporary strategy execution practices of a range of different organisations across industries and sectors.

Holland, New York Times best-selling author of *Everless Dexter* meets *This Savage Song* in this dark fantasy about a girl who sells magical body parts on the black market — until she's betrayed. Nita doesn't murder supernatural beings and sell their body parts on the internet—her mother does that. Nita just dissects the bodies after they've been “acquired.” Until her mom brings home a live specimen and Nita decides she wants out; dissecting a scared teenage boy is a step too far. But when she decides to save her mother's victim, she ends up sold in his place—because Nita herself isn't exactly “human.” She has the ability to alter her biology, a talent that is priceless on the black market. Now on the other side of the bars, if she wants to escape, Nita must ask herself if she's willing to become the worst kind of monster.

Studie over drie drieluiken van de Brabantse schilder Jeroen Bosch (±1453- 1516). Bracket [Takes Action] provokes spatial practice's potential to incite and respond to action today. Over 28 essays and 15 projects investigate the role of design to catalyze a public, as well as forums for that public to act upon. The rise of several divisive leaders within contemporary politics, has once again brought action to the foreground. As a new generation makes their voices heard, they are also grappling to find effective platforms for action through design. The notion of action simultaneously evokes a discussion on what we are acting for and value. This is particularly important to consider at a moment when the authoritative systems--governments and corporations--appear more divergent to the voices on the ground. At the same time, within an increasingly pluralistic society, what we collectively value is increasingly unclear, which presents a primary challenge on action. Bracket [Takes Action] is situated at a critical point in history where the who, what, where, and how of action

need to be re-conceptualized to relate to who we are, how we live, and how we communicate today. The role of design and the agency of the designer are at stake in facilitating or stifling action. Bracket [Takes Action] contains over 28 essays and 15 design projects that are structured into six sub-themes: ReAction, CounterAction, InterAction, FAction, InAction, and RetroAction. The intent of the fourth almanac of Bracket is to unpack the contemporary possibility of action through design. Our contention here is that a democracy in deficit cannot be repaired without a deeper investigation in how actions can be designed, accommodated for, and encouraged. Equally, this is our call to action--it is time for design to take action and greater accountability for its actions in our contemporary socio-political spheres. Bracket [Takes Action] provokes spatial practice's potential to incite and respond to action. This one hundred page book focuses exclusively on how you can best use the ASP.NET MVC 4 Framework to build world-class REST services using the Web API. It sets aside much of what the ASP.NET MVC Framework can do, and focuses exclusively on how the Web API can help you build web services. You will not find any help on CSS, HTML, JavaScript, or jQuery. Nor will you find any help on the Razor view engine, HTML Helpers, or model binding. If you need this information then Pro ASP.NET MVC 4 is your perfect book. Now available in a new edition, this book explores Hieronymus Bosch's masterpiece Garden of Earthly Delights. Few paintings inspire the kind of intense study and speculation as Garden of Earthly Delights, the world-famous triptych by Netherlandish master Hieronymus Bosch. The painting has been interpreted as a heretical masterpiece, an opulent illustration of the Creation, and a premonition of the end of the world. In this book, renowned art historian Hans Belting offers a radical reinterpretation of the work, which he sees not as apocalyptic but utopian, portraying how the world would exist had the Fall not happened. Taking readers through each panel, Belting discusses various schools of thought and explores Bosch's life and times. This fascinating study is an important contribution to the literature and theory surrounding
