Broken Promises is the third book in a trilogy spanning 18 years. Bruce Kushnick, author, senior telecom analyst and industry insider, lays out, in all of the gory details, how America paid over \$400 billion to be the first fully fiber optic-based nation yet ended up 27th in the world for high-speed Internet (40th in upload speeds). But this is only a part of this story. With over four million people filing with the FCC to 'Free the Net', one thing is abundantly clear -- customers know something is terribly wrong. Every time you pay your bills you notice that the price of your services keeps going up, you don't have a serious choice for Internet (ISP), broadband or cable service, much less competitors fighting for your business, or maybe you can't even get very fast broadband service. Worse, over the last few years, America's ISPs and cable companies have been rated "the most hated companies in America". While Net Neutrality concerns (detailed in Broken Promises) are important, the actions are only a first step and will most likely be tied up in court for the next few years. More importantly, it does not resolve most of the customer issues and there is nothing else on the horizon that will fix what's broken. Broken Promises documents the massive overcharging and failure to properly upgrade the networks, the deceptive billing practices, the harms caused from a lack of competition, the gaming and manipulating of the regulatory system, from the states to the FCC, and exposes the companies' primary strategy: How much can we get away with? There has been little, if any, regard for the customers they serve.--From <http://newnetworks.com/bookbrokenpromises/> --(viewed on June 12, 2015).

NEW YORK TIMES BESTSELLER USA TODAY BESTSELLER Amazon, Apple, Facebook, and Google are the four most influential companies on the planet. Just about everyone thinks they know how they got there. Just about everyone is wrong. For all that's been written about the Four over the last two decades, no one has captured their power and staggering success as insightfully as Scott Galloway. Instead of buying the myths these companies broadcast, Galloway asks fundamental questions. How did the Four infiltrate our lives so completely that they're almost impossible to avoid (or boycott)? Why does the stock market forgive them for sins that would destroy other firms? And as they race to become the world's first trillion-dollar company, can anyone challenge them? In the same irreverent style that has made him one of the world's most celebrated business professors, Galloway deconstructs the strategies of the Four that lurk beneath their shiny veneers. He shows how they manipulate the fundamental emotional needs that have driven us since our ancestors lived in caves, at a speed and scope others can't match. And he reveals how you can apply the lessons of their ascent to your own business or career. Whether you want to compete with them, do business with them, or simply

live in the world they dominate, you need to understand the Four.
