An outstanding resource for students and practicing nurses, the Ninth Edition of Lippincott's Manual of Psychiatric Nursing Care Plans contains 52 nursing care plans that address the most commonly encountered behaviors in psychiatric-mental health nursing. An excellent tool to introduce students to clinical psychiatric experience, the Manual demonstrates use of the nursing process in psychiatric nursing and gives suggestions for specific interventions--with rationale--to address particular behaviors, giving the student a sound basis on which to build clinical skills. Covering a range of problems and a variety of approaches, the care plans are meant to be adapted and individualized in planning nursing care for each client. The Ninth Edition has been thoroughly updated and includes new information on complementary and alternative medicine and using the internet; as well as new or expanded appendices on psychopharmacology; side effects of medications and related nursing interventions; and schizoid, histrionic, narcissistic, and avoidant personality disorders.

Accompanying CD-ROM has nursing care plans, a customizable psychosocial assessment tool, and monographs about psychotropic drugs.

A patient's personal view of long term care. Seen through the eyes of a patient totally paralyzed with Guillain-Barré syndrome, this moving book takes you through the psychological and physical pain of an eleven month hospital stay. BED NUMBER TEN reads like a compelling novel, but is entirely factual. You will meet: The ICU staff who learned to communicate with the paralyzed woman - and those who did not bother. The physicians whose visits left her baffled about her own case. The staff and physicians who spoke to her and others who did not recognize her presence. The nurse who tucked Sue tightly under the covers, unaware that she was soaking with perspiration. The nurse who took the time to feed her drop by drop, as she slowly learned how to swallow again. The physical therapist who could read her eyes and spurred her on to move again as if the battle were his own. In these pages, which reveal the caring, the heroism, and the insensitivity sometimes found in the health care fields, you may even meet people you know.
