How can we best describe the processes by which we visually perceive our environment? Contemporary perceptual theory still lacks a coherent theoretical position that encompasses both the limitations on the information that can be retained from a single eye fixation and the abundant phenomenal and behavioral evidence for the perception of an extended and coherent world. As a result, many leading theorists and researchers in visual perception are turning with new or renewed interest to the work of Julian Hochberg. For over 50 years, in his own experimental research, in his detailed consideration of examples drawn from a wide range of visual experiences and activities, and most of all in his brilliant and sophisticated theoretical analyses, Hochberg has persistently engaged with the myriad problems inherent in working out the kind of coherent theoretical position the field currently lacks. The complexity of his thought and the wide range of areas into which Hochberg has pursued the solution to this central problem have, however, limited both the accessibility of his work and the appreciation of his accomplishment. In this volume we seek to bring the full range of Hochberg's work to the attention of a wider audience by offering a selection of his key works, many taken from out-of-print or relatively inaccessible sources. To facilitate the understanding of his accomplishment, and of what his work has to offer to contemporary researchers and theorists in visual perception, we include commentaries on salient aspects of his work by 20 noted researchers. In the *Mind's Eye* will be of interest to researchers working on topics such as perceptual organization, visual attention, space perception, motion perception, visual cognition, the relationship between perception and action, picture perception, and film, who are striving to obtain a deeper understanding of their own fields, and who want to integrate this understanding into a broader, unified view of visual perceptual processing.

'On Sunday next, the 14th inst., the Reverend John Creedy, B.A., of Magdalen College, Oxford, will preach in Walton Magna Church on behalf of the Gold Coast Mission.' Not a very startling announcement that; and yet, simple as it looks, it stirred Ethel Berry's soul to its inmost depths. For Ethel had been brought up by her Aunt Emily to look upon foreign missions as the one thing on earth worth living for and thinking about; and the Reverend John Creedy, B.A., had a missionary history of his own, strange enough even in these strange days of queer juxtapositions between utter savagery and advanced civilisation.
