The VW Super Beetle was a different beast from the very simple original Beetle. McPherson struts at the front and semi-trailing arms at the rear were more sophisticated than the older car and a bigger engine gave it more performance. Long ignored by most restorers, it is becoming more desirable as the stocks of older cars are restored or rust away. This book tells you how to restore a Super Beetle to clean, roadworthy condition with minor modifications to improve performance and handling. It describes a detailed build-up from paint and body to interior and mechanical parts. It is an invaluable guide for any Super Beetle owner or restorer.

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*.

Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready

Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.
