\* \* \* 'Informative and entertaining, this publication is a feast for the eyes, while also thought provoking, and offers excellent inspiration for daydreaming about what makes the perfect, modern house.' Wallpaper 'A fascinating selection of innovative homes....this is a thoughtful journey through the evolution of domestic architecture.' Sunday Express Over the last century the way that we live at home has changed dramatically. Nothing short of a design revolution has transformed our houses and the spaces within them - moving from traditional patterns of living all the way through to an era of more fluid, open-plan and modern styles. Whether we live in a new home or a period house, our spaces will have been shaped one way or another by the pioneering Modernists and Mid-century architects and designers who argued for a fresh way of life. Architectural and design writer Dominic Bradbury charts the course of this voyage all the way from the late 19th century through to the houses of today in this ground-breaking book. Over nineteen thematic chapters, he explains the way our houses have been reinvented, while taking in - along the way - the giants of Art Deco, influential Modernists including Le Corbusier and Frank Lloyd Wright, as well as post-war innovators such as Eero Saarinen and Philip Johnson. Taking us from the 20th to the 21st century, Bradbury explores the progress of 'modernity' itself and reveals the secret history of our very own homes.

Osprey's study of one of the most important battles of the long-elasting Germanic Wars (113 BC - 439 AD). Arminius, a young member of the Cheruscan tribe under the Roman Empire felt that Rome could be beaten in battle and that such a victory would guarantee the freedom of the Germans as a confederation of independent tribes, led by the Cherusicans, who would - in turn - be led by him. Throughout AD 8 and the early part of AD 9, Arminius used his position under the governor of Germania Inferior well, ostensibly promoting Rome whilst in reality welding the tribes together in an anti-Roman alliance, agreeing with his confederates that they would wait until the Roman garrison had moved to their summer quarters and then rise up against the invaders. With the arrival of September, the time soon came for the Roman troops to return to their stations along the Rhine and as they marched westwards through the almost impenetrable Teutoburg Forest, Arminius sprang his trap. In a series of running

battles in the forest, Varus' army, consisting of three Roman Legions (XVII, XVIII and XIX) and several thousand auxiliaries - a total of roughly 20,000 men - was destroyed. The consequences for Rome were enormous - the province of Germania was now virtually undefended and Gaul was open to a German invasion which although it never materialized, led a traumatized Augustus to decree that, henceforth, the Rhine would remain the demarcation line between the Roman world and the German tribes, in addition to which the destroyed legions were never re-formed or their numbers reused in the Roman Army: after AD 9, the sequence of numbers would run from I to XVI and then from XX onwards, it was as if the three legions had never existed.

A singular fatality has ruled the destiny of nearly all the most famous of Leonardo da Vinci's works. Two of the three most important were never completed, obstacles having arisen during his life-time, which obliged him to leave them unfinished; namely the Sforza Monument and the Wall-painting of the Battle of Anghiari, while the third—the picture of the Last Supper at Milan—has suffered irremediable injury from decay and the repeated restorations to which it was recklessly subjected during the XVIIth and XVIIIth centuries. Nevertheless, no other picture of the Renaissance has become so wellknown and popular through copies of every description.

Marie Brennan begins a thrilling new fantasy series in *A Natural History of Dragons*, combining adventure with the inquisitive spirit of the Victorian Age. You, dear reader, continue at your own risk. It is not for the faint of heart—no more so than the study of dragons itself. But such study offers rewards beyond compare: to stand in a dragon's presence, even for the briefest of moments—even at the risk of one's life—is a delight that, once experienced, can never be forgotten. . . . All the world, from Scirland to the farthest reaches of Eriga, know Isabella, Lady Trent, to be the world's preeminent dragon naturalist. She is the remarkable woman who brought the study of dragons out of the misty shadows of myth and misunderstanding into the clear light of modern science. But before she became the illustrious figure we know today, there was a bookish young woman whose passion for learning, natural history, and, yes, dragons defied the stifling

conventions of her day. Here at last, in her own words, is the true story of a pioneering spirit who risked her reputation, her prospects, and her fragile flesh and bone to satisfy her scientific curiosity; of how she sought true love and happiness despite her lamentable eccentricities; and of her thrilling expedition to the perilous mountains of Vystrana, where she made the first of many historic discoveries that would change the world forever.
