In "Letter from Birmingham Jail," Martin Luther King Jr. explains why blacks can no longer be victims of inequality.

Shocking and controversial when it was first published in 1939, Steinbeck's Pulitzer prize-winning epic remains his undisputed masterpiece. It tells of the Joad family who travel West in search of the promised land, and find only broken dreams.

This lauded work of science fiction and New York Times Notable Book of the Year explores a universe where genetic mutations have allowed certain individuals to traverse the stars. It is the second stage of human colonization—the first age, humanity's initial attempt to people the stars, ended in disaster when it was discovered that Earth's original superluminal drive did permanent genetic damage to all who used it—mutating Earth's far-flung colonists in mind and body. Now, one of Earth's first colonies has given humanity back the stars, but at a high price—a monopoly over all human commerce. And when a satellite in Earth's outer orbit is viciously attacked by corporate raiders, an unusual young woman flees to a ship bound for the Up-and-Out. But her narrow escape does not mean safety. For speeding across the galaxy pursued by ruthless, but unknown adversaries, this young woman will discover a secret which is buried deep inside her psyche—a revelation the universe may not be ready to face....

In the spirit of John Carpenter's *The Thing* and Jacob's Ladder comes *Stranded* -- a terrifying, icebound thriller where nothing is quite what it seems by Bracken MacLeod. Badly battered by an apocalyptic storm, the crew of the Arctic Promise find themselves in increasingly dire circumstances as they sail blindly into unfamiliar waters and an ominously thickening fog. Without functioning navigation or communication equipment, they are lost and completely alone. One by one, the men fall prey to a mysterious illness. Deckhand Noah Cabot is the only person unaffected by the strange force plaguing the ship and her crew, which does little to ease their growing distrust of him. Dismissing Noah's warnings of worsening conditions, the captain of the ship presses on until the sea freezes into ice and they can go no farther. When the men are ordered overboard in an attempt to break the ship free by hand, the fog clears, revealing a faint shape in the distance that may or may not be their destination. Noah leads the last of the able-bodied crew on a journey across the ice and into an uncertain future where they must fight for their lives against the elements, the ghosts of the past and, ultimately, themselves. The famous scientific trio of Arcot, Wade and Morey, challenged by the most ruthless aliens in all the universes, blasted off on an intergalactic search for defences against the invaders of Earth and all her allies. World after world was visited, secret after secret unleashed, and turned to mighty weapons of intense force—and still the Thessian enemy seemed to grow in power and ferocity. Mighty battles between huge space armadas were but skirmishes in the galactic war, as the invincible aliens savagely advanced and the Earth team hurled bolt after bolt of pure ravaging energy—until it appeared that the universe itself might end in one final flare of furious torrential power....

An Economist Best Book of the Year A Milwaukee Journal Sentinel Best Book of 2018 “An amazing and engrossing history...Insightful, entertaining, and compulsively readable.” — George R. R. Martin “Enthralling...A clarion call to enlarge American literary history.” — Washington Post “Engrossing, well-researched... This sure-footed history addresses important issues, such as the lack of racial diversity and gender parity for much of the genre’s history.” — Wall Street Journal “A gift to science fiction fans everywhere.” — Sylvia Nasar, New York Times bestselling author of *A Beautiful Mind* Astounding is the landmark account of the extraordinary partnership between four controversial writers—John W. Campbell, Isaac Asimov, Robert A. Heinlein, and L. Ron Hubbard—who set off a revolution in science fiction and forever

changed our world. This remarkable cultural narrative centers on the figure of John W. Campbell, Jr., whom Asimov called “the most powerful force in science fiction ever.” Campbell, who has never been the subject of a biography until now, was both a visionary author—he wrote the story that was later filmed as *The Thing*—and the editor of the groundbreaking magazine best known as *Astounding Science Fiction*, in which he discovered countless legendary writers and published classic works ranging from the *I, Robot* series to *Dune*. Over a period of more than thirty years, from the rise of the pulps to the debut of *Star Trek*, he dominated the genre, and his three closest collaborators reached unimaginable heights. Asimov became the most prolific author in American history; Heinlein emerged as the leading science fiction writer of his generation with the novels *Starship Troopers* and *Stranger in a Strange Land*; and Hubbard achieved lasting fame—and infamy—as the founder of the Church of Scientology. Drawing on unexplored archives, thousands of unpublished letters, and dozens of interviews, Alec Nevala-Lee offers a riveting portrait of this circle of authors, their work, and their tumultuous private lives. With unprecedented scope, drama, and detail, *Astounding* describes how fan culture was born in the depths of the Great Depression; follows these four friends and rivals through World War II and the dawn of the atomic era; and honors such exceptional women as Doña Campbell and Leslyn Heinlein, whose pivotal roles in the history of the genre have gone largely unacknowledged. For the first time, it reveals the startling extent of Campbell’s influence on the ideas that evolved into Scientology, which prompted Asimov to observe: “I knew Campbell and I knew Hubbard, and no movement can have two Messiahs.” It looks unsparingly at the tragic final act that estranged the others from Campbell, bringing the golden age of science fiction to a close, and it illuminates how their complicated legacy continues to shape the imaginations of millions and our vision of the future itself.

Farewell to the Master Harry Bates d. He could almost remember verbatim his answer: "No, Gnut has neither moved nor been moved since the death of his master. A special point was made of keeping him in the position he assumed at Klaatu's death. The floor was built in under him, and the scientists who completed his derangement erected their apparatus around him, just as he stands. You need have no fears." Cliff smiled again. He did not have any fears. A moment later the big gong above the entrance doors rang the closing hour, and immediately following it a voice from the speakers called out "Five o'clock, ladies and gentlemen. Closing time, ladies and gentlemen." The three scientists, as if surprised it was so late, hurriedly washed their hands, changed to their street clothes and disappeared down the partitioned corridor, oblivious of the young picture man hidden under the table. The slide and scrape of the feet on the exhibition floor rapidly dwindled, until at last there were only the steps of the two guards walkin We are delighted to publish this classic book as part of our extensive Classic Library collection. Peopled by larger-than-life heroes and villains, charged with towering questions of good and evil, *Atlas Shrugged* is Ayn Rand’s magnum opus: a philosophical revolution told in the form of an action thriller—nominated as one of America’s best-loved novels by PBS’s *The Great American Read*. Who is John Galt? When

he says that he will stop the motor of the world, is he a destroyer or a liberator? Why does he have to fight his battles not against his enemies but against those who need him most? Why does he fight his hardest battle against the woman he loves? You will know the answer to these questions when you discover the reason behind the baffling events that play havoc with the lives of the amazing men and women in this book. You will discover why a productive genius becomes a worthless playboy...why a great steel industrialist is working for his own destruction...why a composer gives up his career on the night of his triumph...why a beautiful woman who runs a transcontinental railroad falls in love with the man she has sworn to kill. Atlas Shrugged, a modern classic and Rand's most extensive statement of Objectivism—her groundbreaking philosophy—offers the reader the spectacle of human greatness, depicted with all the poetry and power of one of the twentieth century's leading artists.

A group of scientific researchers, isolated in Antarctica by the nearly-ended winter, discover an alien spaceship buried in the ice, where it crashed twenty million years before. They try to thaw the inside of the spacecraft with a thermite charge, but end up accidentally destroying it when the ship's magnesium hull is ignited by the charge.... Who Goes There? was voted by the Science Fiction Writers of America as one of the stories representing the "most influential, important, and memorable science fiction that has ever been written".

Harry Johnson (1923–1977) was such a striking figure in economics that Nobel Laureate James Tobin designated the third quarter of the twentieth century as 'the age of Johnson'. Johnson played a leading role in the development and extension of the Heckscher-Ohlin model of international trade. Within monetary economics he was also a seminal figure who identified and explained the links between the ideas of the major post-war innovators. His discussion of the issues that would benefit from further work set the profession's agenda for a generation. This book chronicles his intellectual development and his contributions to economics, economic education and the discussion of economic policy.

A group of scientists. An object buried under the ice. A terrifying fight for survival. When a group of scientific researchers, isolated in Antarctica, stumble across an alien spaceship buried in the ice it seems like an incredible opportunity. The alien pilot can just be seen - a shadowy figure frozen just a short depth into the ice. It looks as though he survived the crash only to be flash-frozen on the Antarctic plateau. The team fight the frozen conditions to free the ship from the ice - with disastrous consequences - and rescue the alien. As they transport the corpse, one of their greatest finds, out on the ice back to their camp, several scientists begin to experience extraordinary, vivid and unsettling dreams. They're dismissed as the product of stress and the harsh conditions ... but the nightmare is only beginning.

When Roman junior senator Decius Caecilius Metellus the Younger has a chance to join a diplomatic mission to Alexandria, he welcomes the opportunity to temporarily elude his enemies in the Eternal City—even though it means leaving

his beloved Rome. Decius is just beginning to enjoy the outpost's many exotic pleasures when the suspicious death of an irascible philosopher occurs, coinciding with the puzzling and apocalyptic ravings of a charismatic cult leader. Intrigued, Decius requests and is given permission by the Egyptian Pharaoh to investigate the heinous crime. What he discovers is beyond shocking. And when the corpse of a famous courtesan mysteriously turns up in his bed, Decius suddenly finds himself entangled in a web of conspiracy far more widespread and dangerous than he ever imagined—one that threatens to bring about the downfall of the entire Empire.

Chained up in the hold of a French warship, Lusignan's only hope of escape rests with his captor - Captain Paul. A man with a mysterious past, Captain Paul is transporting Lusignan to exile in the West Indies. Little does he know that his mission is a sham. His prisoner is an innocent man, framed because he fell in love with a Count's daughter. Once the truth is revealed, Paul and Lusignan return to France, determined to seek justice. Inspired by the real life of American Revolutionary War hero John Paul Jones, "Captain Paul" is a rollicking melodrama, packed with action and romance. A fine precursor to Dumas' later classics, it's especially recommended for fans of naval adventures, like C.S. Forester's "Hornblower" series. Alexandre Dumas (1802 - 1870) was a hugely popular 19th Century French writer. Born of mixed French and Haitian heritage, Dumas first rose to prominence in Paris as a playwright, but later gained international fame with his historical fiction. Often co-authored with other writers, these stories wove together swashbuckling adventure, romance, and real events from France's past. Among the best known are "The Three Musketeers", and its

sequels "Twenty Years After", and "Le Vicomte de Bragelonne: Ten Years Later". Set across four decades, this trilogy follows the rise of the dashing D'Artagnan—from hot-headed soldier to trusted captain under Louis XIV. Dumas' other novels include "The Count of Monte Cristo" and "The Black Tulip". His works have been adapted into more than 200 movies, including *The Man in the Iron Mask* starring Leonardo DiCaprio.

Henry David Thoreau built a log cabin in the Concord Forest in Massachusetts in 1845. Thoreau lived there for two years to try out an alternative to the hectic and economically successful everyday life. The reason: He wanted to consciously feel life in harmony with nature again. The minimalist lifestyle should create space and time for the essentials. Thoreau kept a diary about his feelings and experiences during his time in the forest. This book arose from his notes. It deals with his everyday problems, with economic and philosophical considerations, with the feeling of loneliness, with the animals of the forest, with the seasons and with the reading of classical works.

The award-winning author of the Mars trilogy takes readers to the last pure wilderness on Earth in this powerful and majestic novel. "Antarctica may well be the best novel of the best ecological novelist around."—Locus It is a stark and inhospitable place, where the landscape itself poses a challenge to survival, yet its strange, silent beauty has long fascinated scientists and adventurers. Now Antarctica faces an uncertain future. The international treaty which protects the continent is about to dissolve, clearing the way for Antarctica's resources to be plundered, its eerie beauty to be savaged. As politicians wrangle over its fate, major corporations begin probing for its hidden riches. Adventurers come, as they have for more than a century, seeking the wild, untamed land even as they endanger it with their ever-growing numbers. And radical environmentalists carry out a covert campaign of sabotage to reclaim the land from those who would destroy it for profit. All who come here have their own agenda, and all will fight to ensure their vision of the future for the remote and awe-inspiring world at the South Pole. Praise for *Antarctica* "Forbidding yet fascinating, like the continent it describes . . . echoes Jon Krakauer's *Into Thin Air*."—People "[Antarctica] should be included in any short-list of books about the frozen continent.... Compelling characters...a rich and dense story...Robinson has succeeded not only in drawing human characters but also in bringing Antarctica to life. Whatever happens in the outer world, Antarctica—both the book and the continent—will become part of the reader's interior landscape."—The Washington Post Book World "The epic of Antarctica. This is the James A. Michener novel of the South Pole. If the meaty one-word title didn't give it away, the writing would. The whole human history of the continent is here."—Interzone "Antarctica will take your breath away."—Associated Press "A gripping tale of adventure on the ice."—Publishers Weekly "Passionate, informed...vastly entertaining."—Kirkus Reviews "Robinson writes about geography and geology with the intensity and unhurried attention to detail of a John McPhee."—The New York Times Book Review

"Terrifying... Eloquent... A heart-rending drama of human yearning." --New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. Digging deeply, he takes an inherently compelling mystery and unravels the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.

In the summer of 1862, President Lincoln called General Henry W. Halleck to Washington, D.C., to take command of all Union armies in the death struggle against the Confederacy. For the next two turbulent years, Halleck was Lincoln's chief war advisor, the man the President deferred to in all military matters. Yet, despite the fact that he was commanding general far longer than his successor, Ulysses S. Grant, he is remembered only as a failed man, ignored by posterity. In the first comprehensive biography of Halleck, the prize-winning historian John F. Marszalek recreates the life of a man of enormous achievement who bungled his most important mission. When Lincoln summoned him to the nation's capital, Halleck boasted outstanding qualifications as a military theorist, a legal scholar, a brave soldier, and a California entrepreneur. Yet in the thick of battle, he couldn't make essential decisions. Unable to produce victory for the Union forces, he saw his power become subsumed by Grant's emergent leadership, a loss that paved the way for Halleck's path to obscurity. Harnessing previously unused research, as well as the insights of modern medicine and psychology, Marszalek unearths the seeds of Halleck's fatal wartime indecisiveness in personality traits and health problems. In this brilliant dissection of a rich and disappointed life, we gain new understanding of how the key decisions of the Civil War were taken, as well as insight into the making of effective military leadership.

Horror and Wonder at the Ends of the Earth Writers are drawn to the unreachable places of the Earth - to the greatest mountains and depths of the sea, the most barren deserts, and to the white frozen deserts surrounding the north and south poles. In our minds' eyes, the beauty and mystery of the ice descends from Poe to the present and into the future, an infinite realm of wonder.

In the year 2126, scientists Arcot and Morey chase a sky pirate—and invent the technology to travel through space. In the second story, the heroes travel to Venus and make first contact with an alien species. Finally, they must defend the solar system from invaders whose own star has long since gone dark. Originally published separately as “Piracy Preferred” in *Amazing Stories* June 1930 edition, “Solarite” in *Amazing Stories* November 1930, and “The Black Star Passes” in *Amazing Stories Quarterly* Fall 1930, these three novellas were edited and collected into this volume in 1953. This is the first book in John W. Campbell’s Arcot, Morey, and Wade trilogy. Most famous for editing *Astounding Science Fiction* and *Fact* magazine and introducing Isaac Asimov, Robert Heinlein, and many other great science fiction authors to the world, Campbell’s other notable works include the novella “Who Goes There?”, which was adapted to film as *The Thing* by John Carpenter in 1982. This book is part of the Standard Ebooks project, which produces free public domain ebooks.
