The book provides an informative analysis of how classic board games that everyone has played—and probably owns—are not only great family entertainment but also develop core educational skills that have been proven to lead to academic achievement. Through A Board Game Education readers learn a bit of the fascinating history trivia and little-known facts regarding the most loved board games of all time (i.e., how Monopoly was used by WWII POWs to escape). At the same time, Hinebaugh identifies the distinct educational skills developed by each of these games and explores in detail how the play of these games cultivates such skills. A Board Game Education also provides valuable suggestions about how to modify and vary these classic board games to specifically enhance additional core educational skills and concepts. Who would have thought that Candy Land could be modified into a strategy game and Chutes and Ladders could be used to teach algebraic equations and advanced math.

A jargon-free manual on the basics of developing interesting fictional characters Vibrant, believable characters help drive a fictional story. Along with a clever plot, well-drawn characters make us want to continue reading a novel or finish watching a movie. In Creating Characters, Dwight V. Swain shows how writers can invent interesting characters and improve them so that they move a story along. "The core of character," he says in chapter 1, "lies in each individual story person's ability to care about something; to feel implicitly or explicitly, that something is important." Building on that foundation—the capacity to care—Swain takes the would-be writer step-by-step through the fundamentals of finding and developing "characters who turn you on." This basic but thought-provoking how-to is a valuable tool for both the novice and the seasoned writer.

Essential cultural information about personal health is the topic of this collection of activities for the young ESL student.

"What is truth?" has long been the philosophical question par excellence. The Nature of Truth collects in one volume the twentieth century's most influential philosophical work on the subject. The coverage strikes a balance between classic works and the leading edge of current philosophical research. The essays center around two questions: Does truth have an underlying nature? And if so, what sort of nature does it have? Thus the book discusses both traditional and deflationary theories of truth, as well as phenomenological, postmodern, and pluralist approaches to the problem. The essays are organized by theory. Each of the seven sections opens with a detailed introduction that not only discusses the essays in that section but relates them to other relevant essays in the book. Eleven of the essays are previously unpublished or substantially revised. The book also includes suggestions for further reading. Contributors Linda Martín Alcoff, William P. Alston, J.L. Austin, Brand Blanshard, Marian David, Donald Davidson, Michael Devitt, Michael Dummett, Hartry Field, Michel Foucault, Dorothy Grover, Anil Gupta, Martin Heidegger, Terence Horgan, Jennifer Hornsby, Paul Horwich, William James, Michael P. Welcome to a world of subversive literature filled with magical wisdom and the decoding of the occult. In this volume, author Azazel Rama explores the ancient secrets of astral travel and reveals a doorway to the multiverse of endless potential. He then reveals how the heretical views of science and nature can slay the dragon of religion with common sense. This is not a self-help seminar filled with happy sunshine, nonsense codes, and false rainbows; this is a journey into the forbidden. "The Church of the Free Mind" has opened its gates, and within this Holy Temple no messiah shall be said to exist. Written as a diatribe against words, this is the true philosophy of a snake swallowing its own tail. Behold the self-consuming god that exists within the flesh and souls of all living beings. Embark upon a spiritual exploration of a higher order of freedom as it relates to an unconsciously connected society of human animals, and learn the moral codes of Mother Nature as she echoes a sense of natural law through the depths of our collective being. This collection of essays proposes a way to enter a new cycle of human understanding.
