The Fundamentals of Small Group Communication provides readers with the fundamentals they need to become functional and productive members of any small group. Readers are introduced to the fundamental issues faced by all small groups (such as socialization, development, ethics, diversity) and the procedures utilized by effective small groups (for example, task accomplishment, decision making, climate). With a focus on the individual group member, this textbook encourages readers to reflect on how their communication behaviors (e.g., communication traits, verbal and nonverbal communication, listening style) and practices (e.g., their leadership style, their conflict management style) contribute to their current small group experiences. Family Communication: Cohesion and Change encourages students to think critically about family interaction patterns and to analyze them using a variety of communication theories. Using a framework of family functions, current research, and first-person narratives, this text emphasizes the diversity of today's families in structure, ethnic patterns, gender socialization, and developmental experiences. We naturally create stories to help us making meaning of our world, but in conflict situations the kinds of stories we typically tell ourselves can actually make it harder for us to manage and resolve the conflict constructively. This book provides an accessible framework for understanding why people tell their conflict stories the way they do, and how to help them move away from conflict stories that prevent them from understanding and responding to conflict in an effective way. Presented using highly engaging and accessible cases, the book is designed to help people working with others in conflict to fully support them by understanding which areas of the conflict story to focus their attention on, and using practical techniques to support people to rewrite their story into a more constructive one to better manage the situation. The book also provides practical strategies to help people who are themselves in a conflict scenario to rewrite and enact a version of their conflict story that helps them to more constructively manage, and often resolve, their situation. A conflict management coaching system is introduced that is designed to address the particular problems created by dysfunctional conflict stories. This is a book specifically for those who work with people in conflict (mediators, conflict coaches, managers, lawyers, HR staff, teachers) and also for anyone who wishes to better understand their own experience of conflict.

Communication in Legal Advocacy integrates work in legal theory, communication theory, social science research, and strategic planning to provide a comprehensive analysis of the communication process in trials. Responding to the energizing interest in alternative dispute resolution, calling attention to the ways in which negotiation, mediation, and arbitration interrelate with trials. This study blends traditional argumentative analyses such as the rational-world notions of adversary proceedings, presumption, burden of proof and essential issues with contemporary ideas of narrative rationality. The volume offers the reader a practical and strategic guide to effective trial advocacy, and it provides theoretical insights into trials as socially sanctioned mechanisms of dispute resolution.

Since 1982, Nigeria has experienced more than ten large scale ethnic or religious riots in its major cities. These violent clashes have wreaked economic, political, and social havoc; caused an enormous number of deaths and injuries; and posed serious obstacles to Nigeria's sociopolitical development as well as retarded efforts at nation-building. The papers collected in this book serve as a critical part of an overall objective to develop and promote mechanisms for the understanding and resolution of ethnic and religious conflicts in Nigeria. Both academic and community leaders address various aspects of these conflicts, and Uwazie offers several thoughtful options for their successful resolution. Inter-Ethnic and Religious Conflict Resolution in Nigeria will interest students of African history and current affairs, scholars of anthropology and ethnicity studies, and those involved in international relations and peace studies.

In real-life conflict resolution situations, one size does not fit all. Just as a mechanic does not fix every car with the same tool, the conflict resolution practitioner cannot hope to resolve every dispute using the same technique. Practitioners need to be comfortable with a wide variety of tools to diagnose different problems, in vastly different circumstances, with different people, and resolve these conflicts effectively. The Conflict Resolution Toolbox gives you all the tools you need: eight different models for dealing with the many conflict situations you encounter in your practice. This book bridges the gap between theory and practice and goes beyond just one single model to present a complete toolbox - a range of models that can be used to analyze, diagnose, and resolve conflict in any situation. It shows mediators, negotiators, managers, and anyone needing to resolve conflict how to simply and effectively understand and assess the situations of conflict they face. And it goes a step further, offering specific, practical guidance on how to intervene to resolve the conflict successfully. Each model provides a different and potentially useful angle on the problem, and includes worksheets and a step-by-step process to guide the reader in applying the tools. Offers eight models to help you understand the root causes of any conflict. Explains each model's focus, what kind of situations it can be useful in and, most importantly, what interventions are likely to help. Provides you with clear direction on what specific actions to choose to resolve a particular type of conflict effectively. Features a detailed case study throughout the book, to which each model is applied. Additional examples and case studies unique to each chapter give the reader a further chance to see the models in action. Includes practical tools and worksheets that you can use in working with these models in your practice. The Conflict Resolution Toolbox equips any practitioner to resolve a wide range of conflicts. Mediators, negotiators, lawyers, managers and supervisors, insurance adjusters, social workers, human resource and labour relations specialists, and others will have all the tools they need for successful conflict resolution.

Learn how to engage in and resolve conflict productively to improve work relationships and create a more equitable community for children. Conflicts are inevitable, often hard to navigate, and can quickly multiply and become unmanageable. And resolving conflict requires self-reflection, understanding, and vulnerability. But knowing how to tackle difficult conversations will strengthen relationships, create a more equitable community, and improve the impact educators have on the young children they work with. The first of its kind, Finding Your Way Through Conflict specifically focuses on conflict in early childhood education settings and gives concrete steps and strategies to help manage and resolve it productively. Authors Chris Amirault, Ph.D., and Christine M. Snyder, M.A., have decades of experience in early childhood education programs and conflict resolution. Built on their expertise and their own experiences, the book's conflict scenarios are engaging and authentic, empowering educators to get in and out of conflict in a variety of personal, organization, and cultural contexts. Some of these scenarios include: The Discombobulated Team: The children's artwork you posted in the classroom yesterday is gone. Who took it down—and why? The Intent/Impact Disagreement: You were only trying to help! So why is that parent offended? The Unexpected Disaster: Your team planned every aspect of that difficult parent meeting for days. So why was it such a catastrophe? A free PLC/Book Study Guide is available at [freespirit.com/plc](http://freespirit.com/plc).

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and

its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed. Presenting theories about why humankind, despite its efforts for peace, is in a perpetual state of conflict, the members of the Stanford Center on Conflict and Negotiation consider the obstacles to and processes for harmonious communication. This source book is for people working in areas affected by conflict and violence. Easy to use and developed over a number of years by the organization./ Responding to Conflict (RTC), in collaboration with practitioners from around the world, this book provides down to earth techniques for conflict analysis. Examples are drawn from around the world—including Cambodia, Afghanistan, South Africa, Kenya, Northern Ireland, and Colombia.

Throughout the world there are efforts both large and small to address ethnic conflicts-identity based disputes between groups who are unable to live side-by-side in the same state. This book brings together a collection of case studies on interventions in ethnic conflicts throughout the world in which the nature of the state is a core concern (Turkey, Russia, Macedonia, Guatemala, Israel, Cyprus, Northern Ireland, South Africa, US) and asks how the projects themselves understand success and failure in ethnic conflict resolution. It emphasises the complexity and importance of better understanding ways in which small-scale interventions can sometimes have a large impact on large-scale ethnic conflict, and how the goals of the intervenors shift as the participants redefine the identities and interest at stake.

Total quality management (TQM), reengineering, the workplace of the twenty-first century--the 1990s have brought a sense of urgency to organizations to change or face stagnation and decline, according to *Enhancing Organizational Performance*. Organizations are adopting popular management techniques, some scientific, some faddish, often without introducing them properly or adequately measuring the outcome. *Enhancing Organizational Performance* reviews the most popular current approaches to organizational change--total quality management, reengineering, and downsizing--in terms of how they affect organizations and people, how performance improvements can be measured, and what questions remain to be answered by researchers. The committee explores how theory, doctrine, accepted wisdom, and personal experience have all served as sources for organization design. Alternative organization structures such as teams, specialist networks, associations, and virtual organizations are examined. *Enhancing Organizational Performance* looks at the influence of the organization's norms, values, and beliefs--its culture--on people and their performance, identifying cultural "levers" available to organization leaders. And what is leadership? The committee sorts through a wealth of research to identify behaviors and skills related to leadership effectiveness. The volume examines techniques for developing these skills and suggests new competencies that will become required with globalization and other trends. Mergers, networks, alliances, coalitions--organizations are increasingly turning to new intra- and inter-organizational structures. *Enhancing Organizational Performance* discusses how organizations cooperate to maximize outcomes. The committee explores the changing missions of the U.S. Army as a case study that has relevance to any organization. Noting that a musical greeting card contains more computing power than existed in the entire world before 1950, the committee addresses the impact of new technologies on performance. With examples, insights, and practical criteria, *Enhancing Organizational Performance* clarifies the nature of organizations and the prospects for performance improvement. This book will be important to corporate leaders, executives, and managers; faculty and students in organizational performance and the social sciences; business journalists; researchers; and interested individuals. The counselor, teacher, and founder of The Relationship School reveals the origins of conflict styles, and how to stop avoiding and resolve conflict in relationships with loved ones. Conflicts in our closest relationships are scary because so much is at stake. If the conflict doesn't go well, we could lose our marriage, our family or our job, all connected to our security and survival. So we do just about anything not to lose those relationships, including avoid conflict, betraying ourselves or becoming dishonest. Unresolved conflict affects every single aspect of our lives, from self-confidence to physical and mental health. Jayson Gaddis is a personal trainer for relationships and one of the world's leading authorities on interpersonal conflict. For almost two decades, Gaddis has helped individuals, couples, and teams get to the bottom of their deepest conflicts. He helps people see the wisdom in conflict and how to get to zero—which means we have successfully worked through our conflict and have nothing in the way of a good connection. In *Getting to Zero*, Gaddis shows the reader how to stop running away from uncomfortable conversations and instead learn how to work through them. Through funny personal stories, uncomfortable examples, and effective tools and skills, he shows the reader how to move from disconnection to connection, acceptance, and understanding. This method upgrades the old tired and static conflict resolution approaches and offers a fresh, street-level, user-friendly road map on exactly how to work through conflict with the people you care most about.

The award-winning first edition of *The Promise of Mediation*, published ten years ago, is a landmark classic that changed the field's understanding of the theory and practice of conflict intervention. That volume first articulated the "transformative model" of mediation, which greatly humanized the vision of how the mediation process could help parties in conflict. In the past decade, the transformative model has proved itself and gained increasing acceptance. It is now being used in such diverse arenas as workplace, community, family, organizational, and public policy conflicts, among others. In this new edition, the authors draw on a decade of work in theory development, training, practice, research, and assessment to present a thoroughly revised and updated account of the transformative model of mediation and its practical application, including a compelling description of how the field has moved toward increasing acceptance of the transformative model a new and clearer presentation of the theory and practices of transformative mediation, with many concrete examples a new case study that provides a vivid picture of the model in practice, with a commentary full of new information about how to use it effectively clarifications of common misconceptions about the model a vision for the future that shows how the model can coexist with other approaches and where the "market" for transformative mediation is emerging This volume is a foundational resource on transformative practice, for both readers of the first edition and new readers - including mediators, facilitators, lawyers, administrators, human resource professionals, policymakers, and conflict resolution researchers and educators. More generally, this book will strike a chord with anyone interested in humanizing our social institutions and building on a relational vision of society.

Problems that "just won't go away" can be settled through methods developed by one of America's leading experts in conflict resolution. In clear language, Weeks shows readers how to turn conflict into lasting partnerships and ensure a fruitful outcome. A transformational approach to conflict argues that conflicts must be viewed as embedded within broader relational patterns and social and discursive structures. Central to this book is the idea that the origins of transformation can be momentary, situational, and small-scale or large-scale and systemic. The momentary involves shifts and meaningful changes in communication and related patterns that are created in communication between people. Momentary transformative changes can radiate out into more systemic levels, and systemic transformative changes can radiate inward to more personal levels. This book engages this transformative framework by bringing together current scholarship that epitomizes and highlights the contribution of communication scholarship and communication-centered approaches to conflict transformation in personal, family, and working relationships and organizational contexts. The resulting volume presents an engaging mix of scholarly chapters, think pieces, and personal experiences from the field of practice and everyday life. The book embraces a wide variety of theoretical and methodological approaches, including narrative, critical, intersectional, rhetorical, and quantitative. It makes a valuable additive contribution to the ongoing dialogue across and between disciplines on how to transform conflicts creatively, sustainably, and ethically.

As our world grows smaller, opportunities for conflict multiply. Ethnic, religious, political, and personal differences drive people apart—with potentially disastrous consequences—and it's the task of perceptive leaders to bring them together again. World-renowned mediation expert Mark Gerzon argues that leaders have failed to rise to this challenge. Our organisations, schools, and governments remain filled with divisive dictators and everyday managers, instead of what he calls mediators—leaders who transform conflict so that everyone can move forward together. Through absorbing examples drawn from decades of work with organisational, political, and global conflicts of all kinds, *Leading Through Conflict* provides a powerful new framework for the leader as mediator, and outlines eight specific tools these leaders use to transform seemingly intractable differences into progress on deep-seated problems. Both practical and passionate, this book makes the tools of cross-border leaders accessible to anyone who wants to help create healthier companies, communities, and countries.

*Mass Communication Theories: Explaining Origins, Processes, and Effects* explores mass communication theories within the social and cultural context that influenced their origins. An intimate examination of the lives and times of prominent mass communication theorists both past and present bring the subject to life for the reader.

A Guide to Effective Communication for Conflict Resolution enables the reader, first of all, to just notice their present approach to communication. It introduces 9 Principles of Effective Communication, explains them through examples and then encourages the reader to practise the Principles in their own communication. In essence the Principles are simple, but they are personally challenging because they cause us to reassess what may be common practices in our everyday communication. It is important to notice these common practices in ourselves and others first of all, to see how prevalent and unconscious they are. Once we have become more conscious or 'mindful' about our communication we can apply the Principles to our day-to-day interactions and see the difference in others' responses to us, as well as in our own contributions to communication. We then see how practising the Principles can lead to a greater sense of connection and more creative responses to the inevitable conflicts we experience with others. Alan Sharland has been a Mediator since 1994, starting as a volunteer Mediator for Camden Mediation Service in London, UK. Prior to this he was a Teacher of Mathematics in a Secondary School in Camden. His involvement in mediation arose from trying to understand more about conflict as a result of a pupil from the school he worked in being murdered by a group of youths. Many of his pupils had been involved in violence either as victims or perpetrators and sometimes both. Working with people involved in destructive conflicts in his role as a Mediator enabled Alan to recognise common behaviours and approaches that typify ineffective responses to conflict. Mediation seeks to enable more effective responses to be created by those involved in a dispute, complaint or other difficulty. Observing how participants in the mediation process moved on to create more effective ways forward for themselves gave the material for the content in this book and evolved into the Principles that inform how Alan practises as a Mediator and Conflict Coach and how he trains others to be Mediators and Conflict Coaches.
