Stress Waves in Non-Elastic Solids is a comprehensive presentation of the principles underlying the propagation of stress waves in non-elastic solids, with emphasis on wave problems in the theory of plasticity. This book exposes wave propagation problems for a range of material responses and justifies the hypotheses introduced in specialized theories and the simplifications made in the analysis of particular problems. Both analytical and numerical methods of solving problems are described, and a large number of solutions to specific problems of wave propagation in inelastic solids are given. This book is comprised of six chapters and begins with an overview of the fundamental equations of the dynamics of inelastic media. The dynamical properties of metals and soils are discussed, offering an account of the most representative theories of plasticity and viscoplasticity. The next chapter considers the basic definitions of discontinuity surfaces and the conditions that must be satisfied across these surfaces. Certain mathematical fundamentals are given, referring to systems of differential equations, quasi-linear and semi-linear, of the first order. Initial and boundary value problems for hyperbolic equations

are also formulated. The remaining chapters focus on methods of solving stress wave propagation problems, including one-dimensional plane waves and longitudinal-transverse waves. Wave propagation problems for elastic-plastic and elastic/viscoplastic media are treated in detail, along with the most important problem of shock waves in metals and soils. The last chapter deals with thermal wave propagation problems. This monograph will be a valuable resource for students and practitioners of engineering, physics, and mathematics.

The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments since the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ? an explanation of the key aspects of the CEFR for teaching and learning; ? a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre–A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ? a short report on the four-year development, validation and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ? promote and support the learning and teaching of modern languages; ? enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ? protect linguistic and cultural diversity in Europe; and ? promote the right to quality education for all.

Arabic-English-Arabic Legal Translation provides a groundbreaking investigation of the issues found in legal translation between Arabic and English. Drawing on a contrastive-comparative approach, it analyses parallel authentic legal documents in both Arabic and English to examine the features of legal discourse in both languages and uncover the different translation techniques used. In so doing, it addresses the following questions: What are the features of English and Arabic legal texts? What are the similarities and differences of English and Arabic legal texts? What are the difficult areas of legal translation between English and Arabic legal texts? What are the techniques for translating these difficult areas on the lexical and syntactic levels? Features include: A thorough description of the features of legal translation in both English and Arabic, drawing on empirical new research, corpus data analysis and strategic two-way comparisons between source texts and target texts Coverage of a broad range of topics including an outline of the chosen framework for data analysis, a historical survey of legal discourse developments in both Arabic and English and detailed analyses of legal literature at both the lexical and syntactic levels Attention to common areas of difficulty such as Shariah Law terms, archaic terms and modal auxiliaries Many examples and excerpts from a wide selection of authentic legal documents, reinforced by practical discussion points, exercises and practice drills to encourage active engagement with the material and opportunities for hands-on learning. Wide-ranging, scholarly and thought-provoking, this will be a valuable resource for advanced undergraduates and postgraduates on Arabic, Translation Studies and Comparative Linguistics courses. It will also be essential reading for translation professionals and researchers working in the field.

It's been three months since Rob's younger sister, Chloe, fell into a coma after a riding accident, and his life is in disarray. Rob's parents spend most of their time at his sister's bedside, and his best friend is afraid to talk to Rob about Chloe. To distract himself, Rob takes a job working at a secret archaeological site, where workers have uncovered a mystical ring of black timbers. At its center an ancient tree is buried upside down in the earth—a tree with the power to transport Rob to the Unworld, where Chloe lives in a forest of enchanting dreams, trapped between life and death. Catherine Fisher has combined a fascinating exploration of myth with a modern quest for understanding. Where is the land of the imagination? And if we found our way there, would we ever want to come back?
